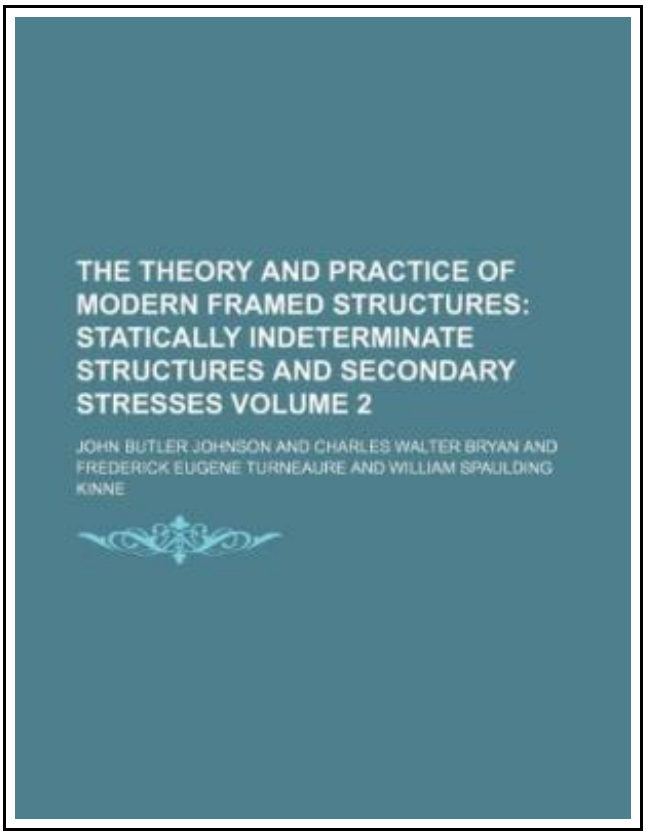
The Theory and Practice of Modern Framed Structures Volume 2



Filesize: 5.47 MB

Reviews

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be play, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.
(Rene Olson)

THE THEORY AND PRACTICE OF MODERN FRAMED STRUCTURES VOLUME 2

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1910 Excerpt: .additional equations now required for the four constants are obtained from the condition that the moments and shears at the right end of section A B of Fig. 50 are equal to those at the left end of section B C. The values of these constants will now be determined. From cqs. (5) and (6) the moments and shears for the various sections are given by the following expressions: The conditions from which the independent equations are to be made up. are as follows: Por x = o, M = o in eq. (.4)-v = /, M = o in cq. (B) x = k I, eq. (A) = eq. (B) x = /, eq. (C) = eq. (D). Substituting these conditions in cqs. (A) to (D), the independent equations are found to be 1/8/ p From these equations, the values of the various constants are given by.=-c-MY-l) - C, --C, f -f8 (14) When eqs. (4), (5), and (6) are used to calculate deflection, moment, or shear, the proper values of C, and C2 are to be substituted as determined for the loading in question. Thus for the loading shown in Fig. 50, the deflection, moment, or shear at any point in section A B is found by substituting values of C, and C, as given by eqs. (11) and (12). For corresponding values in the unloaded portion B C, the values of the constants are given by C: i and C, of eqs. (13)...
