

An Essay on the Application of Mathematical Analysis to the Theories of Electricity and Magnetism

By George Green

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Dimensions: 9.7in. x 7.6in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1828 Excerpt: . . . on the surface in question. Suppose now, all the interior bodies to reduce themselves to a single point P, in which a unit of electricity is concentrated, and f to be the distance Pp: the potential function arising from P will be $\frac{1}{f}$, and hence $\frac{1}{f}$. f r being, as before, the distance between p and the centre O of the shell. Let now b represent the distance OP, and e the angle POp, then will $\frac{1}{f^3} = \frac{1}{b^3} \cos^3 e$ or. From which equation we deduce successively, $\frac{df}{f^3} = -\frac{db}{b^3} \cos^3 e - 3 \frac{db}{b^3} \cos e \sin^2 e$. Making ra in this, and in the value of B before given, in order to obtain those which belong to the surface, there results This substituted in the general equation written above, there arises $\frac{6}{r^4} - \frac{4}{r^4} \cos^2 \theta$ If P is supposed to approach infinitely near to the surface, so that $\theta \rightarrow 0$; being...

Reviews

Good eBook and helpful one. It really is written in straightforward words and phrases and never confusing. I am just effortlessly could possibly get a enjoyment of looking at a published book.

-- **Romaine Rippin**

The book is great and fantastic. it absolutely was written very properly and beneficial. It is extremely difficult to leave it before concluding, once you begin to read the book.
