Soil and groundwater sample characterization and agricultural practices for assessing food chain pathways in biosphere models

By -

No binding. Book Condition: New. This item is printed on demand. Original publisher: Washington, DC : Division of Systems Analysis and Regulatory Effectiveness, Office of Nuclear Regulatory Research, U. S. Nuclear Regulatory Commission, 2005. OCLC Number: (OCoLC)244009517 Subject: Radioactive waste sites -- Environmental aspects -- United States. Excerpt: . . . 1. 0 Introduction Assessment of Food Chain Pathway Parameters in Biosphere Models has been established to assess and evaluate a number of key parameters used in the food-chain models used in performance assessments of radioactive waste disposal facilities. The objectives of the research program include: Provide data and information for the important features, events, and processes of the pathway models for use in biosphere computer codes. These codes calculate the total effective dose equivalent (TEDE) to the average member of the critical group and maximally exposed individual, for example, from radionuclides in the contaminated ground water release scenarios in NRCs performance assessments of waste disposal facilities and decommissioning sites, Reduce uncertainties in food-chain pathway analysis from the agriculture scenarios of biosphere models in performance assessment calculations, Provide better data and information for food-chain pathway analyses by: o Performing laboratory and field experiments, including integral and separate effect experiments,...

Reviews

It becomes an incredible book that we actually have possibly study. It really is rally exciting throgh studying period of time. I am very easily could get a satisfaction of reading through a written book.

-- **Gianni Hoppe**

A really awesome pdf with perfect and lucid reasons. It is actually rally fascinating throgh reading period of time. Your lifestyle period will probably be transform as soon as you total looking over this ebook.
