# Representations Modulaires Des Groupes Reductifs P-Adiques. Representations Cuspiales de $GL(n)$

By Marie-France Vigneras

Springer. Hardcover. Book Condition: New. This item is printed on demand. Hardcover. 264 pages. Taking up the works of Harish-Chandra, Langlands, Borel, Casselman, Bernstein and Zelevinsky, among others, on the complex representation theory of a  $p$ -adic reductive group  $G$ , the author explores the representations of  $G$  over an algebraic closure  $\overline{\mathbb{F}_l}$  of a finite field  $\mathbb{F}_l$  with  $l \neq p$  elements, which are called modular representations. The main feature of the book is to develop the theory of types over  $\overline{\mathbb{F}_l}$ , and to use this theory to prove fundamental results in the theory of modular representations. The present book is of evident importance to everyone interested in the representation theory of  $p$ -adic groups. . . . The monograph starts on an elementary level laying proper foundations for the things to come and then proceeds directly to results of recent research. Zentralblatt This item ships from La Vergne, TN. Hardcover.

## Reviews

*It is one of the best publications. It really is really intriguing through reading through period of time. You will not feel monotony at anytime of your own time (that's what catalogs are for relating to in the event you request me).*

-- Dr. Pat Hegmann

*It is one of my favorite publications. It is among the most awesome publication I have gone through. I am just quickly will get a delight of reading through a published publication.*

-- Prof. Martin Zboncak DVM
